

tooth device press and hold the Device button for 10 seconds.

The device will auto connect for the next one hour. The available Bluetooth® Service and the device is described in the official Shelly API documentation at <https://shelly.io/docs>. For more information on configuration to factory settings, press and hold the button for 30 seconds shortly after the device is powered on.

Initial Inclusion

If you choose to use the Device with the Shelly Smart Control application and cloud service, instruct the device to connect to the Shelly Smart Control app through the Shelly Smart Control app on your smartphone. The Shelly mobile application and Shelly Cloud service are not conditions for the Device to function properly. The device can be used with any other mobile application platform which supports Bluetooth. For more information visit [bthome.io](https://shelly.io).

Replacing the battery

1. Open the back cover as shown in Fig. 4. 2. Push the battery cover slightly off by pushing in through the battery holder shown and then pulling it out. 3. Slide in a new battery as shown in Fig. 6. 4. CAUTION! Use only 3 V CR2032 or a comparable battery. Do not use the battery polarity.

Troubleshooting

When you encounter problems with the installation operation Shelly BLU Door/Window, please visit its knowledge base page: <https://shelly.io/docs>.

Specifications

• Dimensions: 35x36.7 mm (1.381x38.27 in) (sensor unit)

• Weight: 10.5 g (0.353 oz) (Shelly BLU Door/Window)

• Working temperature: -20°C to 40°C (-4°F to 104°F)

• Power supply: 3 V 3 CR2032 battery (included)

• Battery life: 5 years

• RF band: 2400 - 2483.5 MHz

• Beacon function: 4 dBm

• Beacon frequency: AES-128bit encryption (CCM)

• Reachable (depending on the building's Geopointing):
